TREE PLANTATION STRATEGY

The recent unprecedented urbanization and industrialization have made human life more luxurious and comfortable but simultaneously they have led to several environmental and ecological crises. Educational institutions nowadays are becoming more sensitive to environment factors and eco-campus concepts are being introduced to make them sustainable. Waste minimization plans for the academic institutes are now mandatory to maintain the cleanliness of the campus. To find out the environmental performance of the academic institutions and to analyze the possible solutions for converting the academic campus as eco campus, the college authority has adopted a strategically drive for tree plantation. Trees are indispensable resources for the survival of all living creatures. Trees offer food and shelter to diverse organism including animals, birds, insects, fungi etc. In other words it can be said that they ensure the stability of entire ecosystem. For attaining this target the college has planted 350 various plant saplings in the college campus to attain the following aim and objectives :

Aim and Objective of Tree Plantation:-

- To create green belt and avenues for meeting aesthetic recreational needs to the people.
- To beautify the college campus for scenic beauty.
- To held in decreasing global warming.
- To reduce the surface run-off discharge and checking soil erosion of the campus.
- To reduce temperature and increase humidity.
- To reduce noise pollution to the campus.
- To reduce the impacts of air pollution and dust as trees and shrubs are known to be natural sink for air pollutants.
- To provide much needed shade on glaring hot roads during summer.
- Moderating the effect of wind and incoming radiation.
- To promote road development as eco friendly activity.
- Conserve Biodiversity.
- Improve water and Air quality.
